PROJECTS

Crypto-Tracker

- Crypto-Tracker is a web application used to track crypto currencies
- Utilized **Axios** to fetch API data from the **CoinGeko API** in order to provide real time information to the front-end
- Created a clean user interface using **React** and **CSS**
- Implemented **React Hooks** to fully utilize the useEffect and useState features

Amazon Clone

- Amazon Clone is a full stack, E-commerce application simulating a shopping experience
- Integrated **Stripe payment processing** for a realistic E-commerce experience
- Harnessed **Google Firebase** for **user authentication** and **Cloud Functions** for **the back-end**
- Implemented the use of **React Router** to connect all the pages together
- Styled using **Material UI** for the icons and built with **React JS** to help create the Amazon look

Facebook Clone

- Facebook Clone is a full stack, social media application modeled from the actual Facebook
- Designed using **Material UI** for the clean and modern Facebook look
- Instituted **user authentication** with **Google Firebase** and **data storage with Firestore.**

WORK EXPERIENCE

Concierge, First Priority Management, Washington D.C   **September 2016 - Feb 2021**

- Developed and facilitated a concierge training program to train 4 staff members in customer service best practices and standard operating procedures.
- Managed up to 15 daily incoming inquiries, from urgent maintenance requests to prospective tenant inquiries, for a property with 207 units and 621 current tenants.
- Monitored surveillance cameras to identify disruptions, maintain site security, and reduce
